WHIPCORD

KEY DIFFERENECS
Between DRaaS and BaaS

DISASTER RECOVERY AS A SERVICE

BACKUP AS A SERVICE

Your IT infrastructure can't be easily and quickly rebuilt

You can easily reassemble your own infrastructure

You use web-based services or applications that require 24/7 access by staff and/or customers

Access to your data is not required frequently. Your RPO and RTO are acceptable

Your data requirements are increasing

You have an in-house disaster recovery specialist
